

HTML Exercises for Links

Practices Exercise to implement

Exercise #1

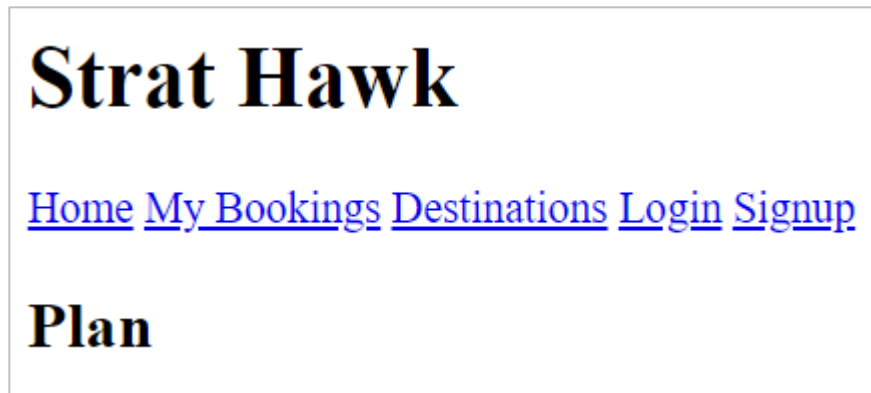

Navigation links for Strat Hawk website

Exercise #1

Navigation links for Strat Hawk website

Navigation Links

- Include navigation links in each page of Strat Hawk website
- This helps user to navigate to any page of Strat Hawk in a single click
- Refer sample output of home page (index.html):

- Clicking each link should navigate to the respective page.
- These links has to be included in all the pages of Strat Hawk

Implementation Guidelines

Step #1: Links in Home Page

1. In Brackets, open 'index.html' from 'strat-hawk' folder
2. Include following anchor tags after `<h1>` tag

```
<h1>Strat Hawk</h1>  
<a href="index.html">Home</a>  
<a href="bookings.html">My Bookings</a>  
<a href="destinations.html">Destinations</a>  
<a href="login.html">Login</a>  
<a href="signup.html">Signup</a>
```

Implementation Guidelines

Step #2: Verify Links

1. Open 'index.html' in Live Preview
2. Click 'My Bookings' and check if it displays bookings.html
3. Click 'Back' button in browser to navigate back to home page
4. Repeat Step 3 and 4 to verify the links 'Destinations', 'Login', 'Signup' and 'Home'

Implementation Guidelines

Step #3: Navigation in all pages

1. Open 'index.html' in Brackets
2. Select all the anchor tags and copy the same

```
<a href="index.html">Home</a>  
<a href="bookings.html">My Bookings</a>  
<a href="destinations.html">Destinations</a>  
<a href="login.html">Login</a>  
<a href="signup.html">Signup</a>
```

3. Paste the anchor tags after <h1> tag in each one the files bookings.html, destinations.html, login.html and signup.html
4. In Live Preview verify navigation to any page from any page of Strat Hawk website
